

The background image is an aerial photograph of a coastal landscape. It shows a mix of dark, sandy or rocky terrain at the bottom, transitioning into a lighter-colored body of water with small ripples. The horizon line is visible in the distance, where the land meets a bright, overexposed sky.

# Table Of Contents

Chapter

**1**

Investigate: add tens, hundreds, and thousands

- 1.1:add tens together
- 1.2: add with hundreds as long with tens
- 1.3: make a model with tens
- 1.4: add with thousands
- 1.5: use 2 digit tens

Chapter

**2**

Investigate: adding with multiplication

- 2.1: multiply 1-digit numbers
- 2.2: adding with 1-digit numbers
- 2.3:using factors with adding of multiplying
- 2.4:imperaint the product
- 2.5: add and multiply with the distributive property
- 2.6: add with 5 digit numbers
- 2.7: use basic facts for adding
- 2.8: use the factor for number-line
- 2.9: add with multiplication
- 2.10:multiply basic numbers with adding

Chapter

**3**

Multiply with mental math and partial products. Estimating too.

- 3.1: multiply with commutative property
- 3.2: estimate by multiplying
- 3.3: multiply with compatible numbers
- 3.4: Algebraic:use mental math for multiplying
- 3.5: Multiply with the distributive property
- 3.5 algebra: multiply with the distributive property 2
- 3.6: use partial products to multiply
- 3.7: use counters to multiply by groups

Chapter

**4**

- 4.1: use an estimate for math
- 4.2: Investigate: Remainders
- 4.3: imperant the remainder
- 4.4: divide by tens
- 4.5: divide with compatible numbers
- 4.6: Divide with the distributive property
- 4.7: divide using subtraction
- 4.8: multiply with division
- 4.9: use mental math to divide
- 4.10: divide by ones
- 4.11: use remainders to subtract
- 4.12: multi-step division problems

CHAPTER

**5**

- 5.1:Model factors
- 5.2: factors and divisibility
- 5.3:common facts
- 5.4: factors and multiples
- 5.5: prime numbers
- 5.6: algebra: number patterns
- 5.6: algebraic: number lines

CHAPTER

7

- 7.1: estimate with the distributive property
- 7.2: multi-steps with numbers and prime numbers
- 7.3: write and estimate
- 7.4: your turn:  $6 \times$  any number
- 7.5: counting by 5's to estimate
- 7.6: estimate 4 -digit numbers
- 7.7: estimate by dividing
- 7.8: word study: divide, dividend, divisor
- 7.9: compatible estimates
- 7.10: math factors
- 7.11: model factors 2
- 7.12: use estimates by Remainders

Chapter

8

- 8.1: tricky factors
- 8.2: invaluable: weighting
- 8.3: money
- 8.4: estimating money

Chapter

9

- 9.1: Number patterns
- 9.2: model facting
- 9.3: game: solve all problems in one minute

Chapter 10,11,12

Testing on chapters  
lessons on page numbers

# Lesson 1.1
